PROJECTS

[07/2026 – Current]

MyPinboard A Flutter app for goal planning, where a large goal is broken into levels and sticky notes on a corkboard so the work feels manageable. You name a challenge, arrange subjects on the board, and the layout is saved locally so you can return to it later.

[06/2026 – Current]

SearchAround A Flutter map app for Dublin that lets you search an Eircode, drop a pin on OpenStreetMap, and overlay danger-zone polygons from local GeoJSON files. It is built in Dart with flutter_map, geocoding, and a Material 3 interface. The idea for the app was the ongoing problem with finding accommodation in the city, the target group being the students.

[02/2026 – 04/2026]

FlightAnalyser A Java Swing desktop app for finding and sorting flight information from both preloaded records and live sources. It uses an external API for real-time data and an Excel spreadsheet as the local database, with a desktop interface for searching and viewing results. It was made as a part of a group project.
